

Pure Ocean - Application form - Call for projects 2021

Pure Ocean is an endowment fund created in 2017 by David Sussmann. Based in Marseille, France, Pure Ocean's main mission is to support innovative applied research projects around the world, thus contributing to the protection of fragile marine ecosystems and biodiversity.

To help you in the application process, please find below the main questions that you will need to answer (2000 characters including spaces maximum). Prepare your answers in advance then copy and paste in the application form. Once you have submitted your application form, you may edit it up (only if you keep the link given right after submitting) until the deadline of ... , 2021 by midnight GMT.

Excellence of the project

Objectives *

Describe the specific objectives for the project. These should be clear, measurable, realistic and achievable within the duration of the project. Describe what needs the project addresses & resolves.

Relation with priority themes *

Our three priority themes are:

1/ Monitoring and discovering:

- Changes in ocean life (productivity, biodiversity, distribution or ranges of any species) & in ocean characteristics (temperature, acidity, currents, chemical cycles).

- Molecules, enzymes and micro-organisms, processes, models of medical interest in marine life (virus, bacteria, ...)

- Impactful diseases & new disorders: harmful algae blooms, coral viral infections, fish diseases...

2/ Achieving sustainability of any marine resource exploitation (algae, energy, ...) including possible development of new pharmaceuticals & medical treatments (biomimicry,...)

3/ Restoring and/or increasing the resilience of fragile marine ecosystems and biodiversity at any scale, with any technique/methodology.

Context *

Describe and explain the overall context around the establishment of your project.

Describe the main ideas, models or assumptions involved. Identify any inter-disciplinary considerations and, where relevant, use of stakeholder knowledge.

Methodology *

Describe and explain the overall methodology, distinguishing, as appropriate, activities indicated in the work plan (section below), e.g. for research, demonstration, piloting, first market replication...

Ambition *

Describe the advance your proposal would provide compared to what already exists, and the extent the proposed work is ambitious and passionate towards saving the Ocean.

Innovation *

Describe the innovation potential which the proposal represents compared to what already exists. Please specify the innovation type(s) your proposal corresponds to (technological, social, or ecological).

Impact of the project

Expected impacts *

Detail any substantial short-, middle- or long-term impacts that would enhance innovation capacity; create new market opportunities, strengthen competitiveness and growth of companies, address issues related to climate change or the environment, or bring other important benefits for society.

Long-lasting outputs *

Describe what will remain once the project is over. What aspects of your design can guarantee long-lasting outputs. What are the specific deliverables ?

Potential barriers *

Describe any barriers or obstacles, and any framework conditions (such as regulation, standards, public acceptance, workforce considerations, financing of follow-up steps, cooperation of other links in the value chain), that may determine whether and to what extent the expected impacts will be achieved.

Dissemination and exploitation of results *

Provide a description of how the results, both during and at the end of the project, will be used to increase its impact amongst stakeholders and the rest of the world.

Communication *

Describe the proposed communication actions (written and oral) for promoting the project and its findings during the period of the grant. Actions should be proportionate to the scale of the project, with clear objectives. They should be tailored to the needs of different target audiences, including groups beyond the project's own community. Where relevant, include actions for public/societal engagement on issues related to the project. Don't hesitate to add any videos or articles with links in the text.

Implementation of the project

Work plan *

Provide a precise description of the different steps that need to be achieved and a preliminary timeline for the length of the project (you can upload a table, graphic, Gantt or Pert chart below if needed).

Management structure *

Describe the organisational structure of the project (roles and interactions between collaborators). Explain why the decision-making mechanisms are appropriate to the complexity and scale of the project.

Contribution of collaborators *

Explain why each collaborator is needed and what specific skills they are adding to the project.

Risk management*

Describe any critical risks relating to project implementation which would affect the achievement of the stated project's objectives. Detail any risk mitigation measures.

Resources *

Provide a detailed explanation indicating the number of person/months required, the materials needed and any other necessary resources. The preliminary budget needs to be detailed per step of the work plan and per collaborator. A minimum functioning budget should also be specified as well as other potential sources of co-funding in the event that we are unable to fund your project in full. You must also provide the budget in spreadsheet or PDF format (see below).

There are also several documents that you will need to upload (1 or 10MB in size maximum):

- CV (in .doc or PDF format);
- Budget (in spreadsheet or PDF format);
- Spreadsheet of your work plan or prototype (in presentation, image or PDF format)
- A high resolution illustration of your project (photo, illustration, graphic)

If you do not have a google account and cannot create one, please send the requested documents, with a clear filename to contact@pure-ocean.org

*Required

1. Email *

Global description of the project

2. Title of the project *

3. Short title / Acronym

4. Summary *

Please include ocean challenges you are answering to, objectives of the project, interdisciplinary collaborators, your concept and methodology, the impacts and outputs and novelty of the project in the summary. Please avoid over-technical terminology.

5. Geographical area of impact of the project *

15. Phone number (including country code) *

16. CV upload *

This document is mandatory so if you do not manage to upload it through this google form, please send it by email at contact@pure-ocean.org. Please name your uploaded document with the project title or acronym.

Files submitted:

Description of all collaborators

17. Full name, Email and Postal address, Phone number of first collaborator *

18. Full name, Email and Postal address, Phone number of second collaborator

19. Full name, Email and Postal address, Phone number of third collaborator

20. Full name, Email and Postal address, Phone number of fourth collaborator

Description of the project

21. Objectives *

Describe the specific objectives for the project using bullet points, which should be clear, measurable, realistic and achievable within the duration of the project. Describe what needs the project addresses & resolves.

22. Relation with priority themes *

Our three priority themes were: 1/ Monitoring and discovering: Either changes in ocean life (productivity, biodiversity, distribution or ranges of any species) & in ocean characteristics (temperature, acidity, currents, chemical cycles). Or molecules, enzymes and micro-organisms, processes, models of medical interest in marine life (virus, bacteria, ...). Or impactful diseases & new disorders: harmful algae blooms, coral viral infections, fish diseases... 2/ Achieving sustainability of any marine resource exploitation (algae, energy, ...) including possible development of new pharmaceuticals & medical treatments (biomimicry,...) 3/ Restoring and/or increasing the resilience of fragile marine ecosystems and biodiversity at any scale, with any technique/methodology.

23. Context *

Describe and explain the overall context around the establishment of your project. Describe the main ideas, models or assumptions involved. Identify any inter-disciplinary considerations and, where relevant, use of stakeholder knowledge.

24. Methodology *

Describe and explain the overall methodology, distinguishing, as appropriate, activities indicated in the work plan (section below), e.g. for research, demonstration, piloting, first market replication...

25. Ambition *

Describe the advance your proposal would provide compared to what already exists, and the extent the proposed work is ambitious and passionate towards saving the Ocean..

26. Innovation *

Describe the innovation potential which the proposal represents compared to what already exists.

27. Innovation type *

Please specify the innovation type(s) your proposal fits to.

Mark only one oval.

- Technological Innovation
- Social Innovation
- Ecological Innovation

Impact of the project

28. Expected impacts *

Detail any substantial short-, middle- or long-term impacts that would enhance innovation capacity; create new market opportunities, strengthen competitiveness and growth of companies, address issues related to climate change or the environment, or bring other important benefits for society.

29. Long-lasting outputs *

Describe what remains once the project is over. What aspects of your design can guarantee long-lasting outputs. What are the specific deliverables?

30. Potential barriers *

Describe any barriers or obstacles, and any framework conditions (such as regulation, standards, public acceptance, workforce considerations, financing of follow-up steps, cooperation of other links in the value chain), that may determine whether and to what extent the expected impacts will be achieved.

31. Dissemination and exploitation of results *

Provide a description of how the results, both during and at the end of the project, will be used to increase its impact amongst stakeholders and the rest of the world.

Horizontal lines for text input.

Communication on your project

32. Communication *

Describe the proposed communication actions (written and oral) for promoting the project and its findings during the period of the grant. Actions should be proportionate to the scale of the project, with clear objectives. They should be tailored to the needs of different target audiences, including groups beyond the project's own community. Where relevant, include actions for public/societal engagement on issues related to the project. Don't hesitate to add any videos or articles with links in the text.

Horizontal lines for text input.

33. Illustration of your project *

Upload an high resolution illustration (photo and / or video) of your project (maximum size 10Mo).

Files submitted:

34. *

Tick all that apply.

I agree that my project's summarised information may be used for communication purposes if my project is selected.

35. In the event that your project is not selected, Pure Ocean would like to contribute to helping you find other sources of financing by sharing your summarised information to potential partners and on our social networks.

Tick all that apply.

I agree that my project's summarised information may be used for communication purposes if my project is not selected.

Implementation of the project

36. Work plan *

Provide a precise description of the different steps that need to be achieved and a preliminary timeline for the length of the project (you can upload a table, graphic, Gantt or Pert chart below if needed).

Horizontal lines for text input.

37. Upload a graphic of your work plan *

This document is mandatory but if you do not manage to upload it through this google form, please send it by email at contact@pure-ocean.org. Please name your uploaded document with the project title or acronym.

Files submitted:

38. Management structure *

Describe the organisational structure of the project (roles and interactions between collaborators). Explain why the decision-making mechanisms are appropriate to the complexity and scale of the project.

39. Contribution of collaborators *

Explain why each collaborator is needed and what specific skills they are adding to the project.

40. Risk Management *

Describe any critical risks relating to project implementation which would affect the achievement of the stated project's objectives. Detail any risk mitigation measures.

41. Resources *

Provide a detailed explanation indicating the number of person/months required, the materials needed and any other necessary resources. The preliminary budget needs to be detailed per step of the work plan and per collaborator. A minimum functioning budget should also be specified as well as other potential sources of co-funding in the event that we are unable to fund your project in full. You must also provide the budget in spreadsheet or PDF format (see below).

42. Upload a spreadsheet of your budget *

This needs to incorporate a section per collaborator, a line per work plan objective and be announced in euros (€). Columns should cover costs of Staff, Travel, Services, Equipment and Total. This document is mandatory so if you do not manage to upload it through this google form, please send it by email at contact@pure-ocean.org. Please name your uploaded document with the project title or acronym.

Files submitted:

43. Anything that distinguishes you and you would like to share & explain (youtube link, passions, ...).

44. Anything else you would like to share with us? If you do not manage to upload it through this google form, please send it by email at contact@pure-ocean.org. Please name your uploaded document with the project title or acronym.

Files submitted:

Auto-evaluation

45. Co-construction *

Reflects inter- or transdisciplinary, collaboration and knowledge-sharing among a variety of stakeholders (e.g., research institutes, government agencies, non-governmental organisations, public or private sector).

Mark only one oval.

1 2 3 4 5

Principal Investigator(s) only In collaboration with multiple stakeholders

46. Engagement *

Demonstrates passion and determination along with the gathering of all relevant and realistic resources to reach effective global change.

Mark only one oval.

1 2 3 4 5

Just seeking funding Very determined, ambitious and realistic

47. Innovation *

Improves our current way of interacting with the planet by developing new visions, techniques and methods. 3 areas of innovation will be considered: technological, social and ecological (inspired by nature).

Mark only one oval.

1 2 3 4 5

Not quite sure if something similar to our project already exists We can prove it is totally new and original

48. Impact *

Corresponds to one or more of the priority themes described above with clearly-defined short, medium, and/or long-term impacts (both quantitative and qualitative impacts as well as any intangible impacts that the project may have).

Mark only one oval.

1 2 3 4 5

Not quite sure how the impact can be quantified Our project has an easily demonstrable and strong impact
